Development Workplace

The screenshot shows the CaptainCasa Enterprise Client interface with several callouts highlighting key features:

- Multiple Layouts:** Points to the top toolbar containing 'Save', 'Refresh Preview', and 'Reload Server' buttons.
- Layout Editor:** Points to the central workspace where a JSP page is being edited, showing a tree view of components and a preview area.
- Project Overview:** Points to the left-hand 'Project Selection / Project Info' panel, which displays project details and a list of files.
- Tools:** Points to the right-hand panels, including the 'Bean Browser' (showing managed server beans), 'Code Generator', and 'Resources'.

Project Selection / Project Info Panel:

Project: demos
Version: 1_1_20080507

Project Files:

- workplace
 - demoactivex.jsp
 - demoasynchinner.jsp
 - demoasynchouter.jsp
 - demobasiccontrols.jsp
 - demobeanprocessing.jsp

text	
actionListener	

Messages Table:

Message	Element	Id
Mandatory attributes: actionListener	tbutton	g_5
Mandatory attributes: actionListener	tbutton	g_10
Mandatory attributes: actionListener	tbutton	g_13
Mandatory attributes: actionListener	tbutton	g_14

Bean Browser Table:

Managed Server Beans	Type
test	Test
crm	CRM
d	Dispatcher
wp	Dispatcher

Adapt to small Screen Sizes...

The screenshots illustrate the process of adapting a web page to smaller screen sizes. The top screenshot shows the desktop view of the IDE with the file 'workplace/demobutton.jsp' open. The middle screenshot shows the same IDE with the page rendered in a smaller, mobile-like view. The bottom screenshot shows the page rendered in an even smaller view, with a yellow callout box providing a warning about the 'contentareafilled' attribute.

Warning: Please pay attention: the normal button comes with a coloring that depends on the Java look and feel that you use. There is an attribute `CONTENTAREAFILLED` that you need to explicitly define to be "false" prior to using `BACKGROUND`, `BGPAIN` and `FOREGROUND`. - The same is true for borders: a button without borders requires `CONTENTAREAFILLED` to be set to "false".

Attribute	Value
contentareafilled	false
image	./images/icons/big
text	

Message	Element	Id
Mandatory attributes: actionListener	tbutton	g_5
Mandatory attributes: actionListener	tbutton	g_10
Mandatory attributes: actionListener	tbutton	g_13
Mandatory attributes: actionListener	tbutton	g_14

Background Information

- The development workplace now uses the Workplace framework coming with CaptainCasa Enterprise Client.
