

Java Property Files

- ...are the ones to keep literals in multiple languages
- ...have a special encoding („escaping“)
- ...are typically maintained by non-developers
- ...so it makes sense to have a centrally available tool to maintain and translate!

Property File Translator

CaptainCasa Enterprise Client: http://www.casabacdemo.com/cctranslate/faces/around.jsp

Literals of Scenario 615893

File Edit | Save All Add new Literal | Add new Language

Use "ctrl-n" in order to create new literals.
 Use "ctrl-s" to save all literals on server side.
 Use "Add new Language" (button in the header bar) in order to open a new language variant.
 Write down the Scenario Id in order to re-access your information at a later point of time!

Please note

- The property editor is available via the link provided in <http://www.CaptainCasa.com>
- You may use the tool without any restrictions. Data you maintain will not be removed.
- But: we do not take over any responsibility for backing up your data!
 - You anyway will download the property files into your Java programs... - do so regularly!
- In case of errors: please contact us through our forum - thanks!
