

Enterprise Client - Download Version License & Copyright Notice

Usage

The following license conditions apply to the download version of the software CaptainCasa Enterprise Client.

The download version of CaptainCasa Enterprise Client can be used as design and runtime for rich client applications.

A usage of CaptainCasa Enterprise Client in a productive environment and a redistribution is only allowed with obtaining an official license from CaptainCasa GmbH. Various types of licenses are available, including the so called "binary license" which allows the free usage and free redistribution with your application. Contact info@CaptainCasa.com for obtaining detailed license information.

All intellectual property that is contained in CaptainCasa Enterprise Client belongs to CaptainCasa GmbH. You must not copy or decompile any part of CaptainCasa Enterprise Client without the agreement of CaptainCasa GmbH.

CaptainCasa might change the download version of CaptainCasa Enterprise Client in any way at any time, also causing incompatibilities to previous versions.

Warranty

CaptainCasa Enterprise Client, download version, is provided WITHOUT WARRANTIES.

Contained Products / Libraries

The delivery of CaptainCasa contains 3rd party products / libraries.

- Java Runtime Environment JRE 1.6 from Sun Microsystems. Copyright and license information is available in the directory <installdir>/server/jre.
- Tomcat Engine by Apache Group. Copyright and license information is available in the directory <installdir>/server/tomcat.
- Some icons in the tools and the demos were taken from <http://www.famfamfam.com/lab/icons/silk/>.
- JasperReports is included as an optional client component - which is available via the GNU Library or Lesser General Public License (LGPL), see <http://sourceforge.net/projects/jasperreports/> for more details
- SimplyHTML is included as an optional client components - which is available via the GNU General Public License. License information is available via <http://simplyhtml.sourceforge.net/> and is available in the about-box of the corresponding editor component as well. - Minimal code changes were done on base of the simplyhtml-package having to do with tailoring the editor to be used as component outside the scope of file processing. The modified source can be obtained any time by sending a mail to info@CaptainCasa.com.
- The demos are using the library JFreeChart, details on licensing are available here: <http://www.jfree.org/jfreechart/>
